VOLUME 43 NO. 3

Published as second class mail. GLEICHEN, ALBERTA, WEDNESDAY APRIL 5, 1950  
Post Office Department, Ottawa.

SUBSCRIPTION \$2.00 PER YEAR

## Mayor Explains Tax Increase For This Year

A letter to the ratepayers of the Town of Gleichen.

Dear Ratepayers: You will find that your taxes will be somewhat higher this year and I am sure you will find that your business tax will be increased this year. The purpose of this letter is to tell you what it is all about and to point out to some extent what you are getting for your tax dollars.

First of all, the school requisition for this year is over \$1,700 more than last year which will take about 4 mills extra. Then we are placing the water tower in operation this year which will give us fire protection almost everywhere in town, even most of the east end as a hydrant will be placed one block west of the new well. New fire hoses will have to be purchased, etc.

At the request of the inspector, we will have to spend up to \$1,000 toward heating and wiring on the Community Hall which will require 2 to 3 mills.

We are also paving the Main street this year from the highway to the Bank of Commerce with all side street approaches partly surfaced with asphalt.

Besides this new program we will maintain all other services so that by the end of 1950, Gleichen will have more services and advantages than any other town of its size I know of.

We find ourselves with: An extensive water system. Extensive sewer system and disposal plant.

Fire protection from a 60,000 gallon overhead tank (valued today at \$20,000).

Chemical fire protection as well. Pressure irrigation system supplied to everyone. Unequaled night lighting.

Paved Main street with sealed approach.

A Community Hall safely wired and properly heated.

A road patrol of our own for the maintenance of our side streets and the highway east as far as the subdivision and north to the cemetery, where the finest police force obtainable anywhere.

Besides a number of other minor services and advantages.

The council, who was in full attendance, have spent several evenings until early hours of the morning to plan the work for 1950 and I think you will find in perusing the above notes that the council is really trying to put Gleichen on the map and give it the status of a great little town to live in.

Respectfully yours,  
W. SUTHERMASTER, Mayor.

## OBITUARY

### JACK RILEY

Jack Riley a resident of Gleichen for some twenty years and who left here in 1927, died Monday at Black Diamond, Alberta. He had been ill for about three weeks with heart trouble. His father predeceased him in 1923. He is survived by his wife at Black Diamond and his brother Joseph in Calgary. The funeral will take place in Calgary this afternoon.

LLOYD—Baby Lloyd of Arrowwood, March 27 funeral took place at 2 p.m. on March 30th. Rev. W. Morrison officiated.

## The Ottawa Letter

Changes in national affairs take place rapidly. Fifteen years ago about a billion dollars was sufficient to run the whole country for a year. Today, the budget statement must provide one billion for the war effort and for the prevention of future wars.

There are fixed charges that must be met before funds are available for the economic development of the country and the welfare of the Canadian people.

The public debt was increased from several billions thirteen years ago by the recent wars. The government has had surpluses during the past four years that have been used for the reduction of this debt. But it now stands at about eleven

## PRINCESS ADMITTED TO THE ROYAL INSTITUTION

H.R.H. Princess Elizabeth, Duchess of Edinburgh, was recently admitted a member of the Royal Institution of

and a half billions.

In this year's budget the present sale tax has been lifted from ice cream, dairy drinks and whipping cream, and from purchases by institutions as orphanages. Other minor changes were made but they are not of any particular help to the average family.

It is realized that any depression in the western world would quickly affect the government revenue. It is fortunate, however, that the loss of three hundred millions of overseas export trade has been offset by an increase of five hundred millions in Canadian exports to U.S.A.

Minister did not see any economic disaster in the immediate future. Trade has increased, and new resources have been discovered. There are also people unemployed, and they are vulnerable to any depression in the countries that purchase our exports.

However, if in some future time we have to face serious difficulties, we will find ourselves better equipped and prepared to resolve them.

### ST. ANDREW'S CHURCH

Good Friday—One hour special service at 3 p.m. Easter Sunday, April 9th. Easter family service and Holy Communion at 12 noon. The parents are asked to bring their children to this service. The Sunday School children are expected to take part in the above Easter service.

Rev. D. Houghton, (Incumbent)...

### WARBLE TIME AGAIN

The small amount of time and material required for warble fly treatment of cattle is the cheapest outlet stockmen can make for the returns obtained. It costs no more than 3c to 5c per head for treatment. This is repaid many times by gains in beef and milk yield, prevention of damage, and the freedom of the cattle from warble discomfort. W. L. Leary, supervisor of crop protection, says that warble cattle were treated last year than during the past few years. There may be good reason for this. As a result of the effectiveness of earlier campaigns, many herds are at present free from warbles. Although it is encouraging to observe these results he warns that because some herds are warble free is no reason for discontinuance of control in the area. Community control is the best way to keep warbles out of Alberta in an endeavor to rid the province of this pest.

The treatment is simple and inexpensive. Warble fly powder containing rotenone or derris can be obtained at the nearest local farm supply or drug store. For treatment use a few handfuls of cattle no manure is required. Simply mix the warble fly wash according to directions and treat by rubbing in the solution with a stiff brush. For larger herds spraying unit is effective and economical. With the machine, a square inch of at least 30 pounds per square inch is required. This will open the coat protective layer covering the openings in the skin so that the insects can penetrate to kill the grub.

Great Britain, when she attended a lecture by Professor A. N. Andrade on "The Nature of Light." She is seen here with Lord Brabazon of Tara, president of the Royal Institution.

tion can penetrate to kill the grub. A number of service boards in Alberta are conducting organized warble fly campaigns with success. Community control is the best way to ensure warble free animals. The Alberta department of agriculture will gladly aid any community desiring to organize a warble fly campaign, and full information can be obtained from the Supervisor of Pest Control, Alberta Department of Agriculture, Edmonton.

## Town & District

The firemen's dance takes place next Monday night and will likely be largely attended.

Mr. and Mrs. Bert Thorburn have left for Victoria, B.C. where they will visit relatives for a time. During the winter Mr. Thorburn has been night fireman at the Old Sun School.

G. T. Jones has returned home from Calgary where he spent several weeks in the hospital. He is much improved in health.

Mr. McMillan celebrated her 80th birthday Tuesday. The occasion was marked by a party given by her daughters at the home of Mrs. G. H. Farquharson.

During the past week or so many farmers have been busy looking over their farming equipment and getting in shape for spring work.

Since the snow has almost disappeared the gardeners are now talking about what they are going to do in a very short time. If all of them who are talking do what they say there should be some wonderful gardens in town this year.

Tom James was married in Calgary on April 1st. He is in the employ of the forestry department of the provincial government and today leaves with his bride for northern Alberta to resume his work. We hope to have more details of the wedding for next week's issue.

Hugh James spent last Friday and Saturday afternoons dragging the streets of the town with his tractor. This work was done on the beds that were somewhat dry and badly treated. The effort was made to help to dry them out faster. The main street near the post office is the worst spot and will likely continue to be very muddy for another week or so. The drainage pipes are plugged and the water cannot run off as the snow and ice melts.

No man can do more than his best but a good many men can do more than they think it their best.

CARD OF THANKS  
We wish to thank all our friends and neighbors for their kindness, and the flowers and pallbearers, Bill Blisset and George Roberts, in our recent bereavement.

Mr. and Mrs. Wm. Lloyd.

## In The Provincial Legislature

By G. E. BELL, M.A.

There has been considerable discussion in the House on the merits and demerits of the County Act. Present legislation only permits the establishing of four counties in the province. This experiment will prove the value if any, that the new set-up has and the Act provides that the ratepayers after four or five years, can vote as to whether they wish to continue the county system or return to the present one.

A Bill amending the Land Titles Act was hurried through the House and assented to by the Lieutenant-Governor. The urgency was to avoid any delay in the construction of the pipe line to the Great Lakes. The amendment facilitates the registration of easements but does not in any way jeopardize the right of the owner of the land.

Public works estimates show that the vote for building and maintaining roads in L.I.D. has been increased by 40 per cent over those of a year ago. Honorable D. B. MacMillan indicated that the nearly twelve million voted for main highway construction; a million dollars will be spent on the Jasper-Edson road; about forty miles will be built between Edmonton and Vegreville; the Camrose-Wetaskiwin road will be laid out; some thirty five miles of the main highway, east of Stettler will be rebuilt as well as about fifty miles on different parts of highway No. 21. Road construction will be done on the road east of Medicine Hat; some considerable work to be done on the Medicine Hat to Strathmore road as well as a number of projects in different parts of the Peace River.

The report on the pilot plant at Blumentown indicates that oil can be separated from the tar sands satisfactorily and a consultant has been hired to study the economics in order to determine whether gas can be produced and marketed on a competitive basis.

One of the reports indicates that the premier's report indicating the results of his negotiations of Alberta's debt refunding program.

The agreement covers \$60,700,000 of debentures being sold in the United States to retire bonds held there. Throughout all of the negotiations it has been our aim, said Mr. Manning, to endeavor to get 3 percent money or better and then take advantage of the call features of our American pay bonds to call and retire the three and a half interest bearing bonds held in the United States.

The schedule divides the bonds into three classes. Those that are due from 1951 to 1953 which amounts to \$15,000,000 and will bear coupons at 2 1/2 percent; those that can run from 1954 to 1958 amounting to \$24,500,000 will bear coupons at 2 1/2 percent and those from 1959 to 1970 amounting to \$21,200,000 will bear interest at 2 1/2 percent. This is an average interest rate of 2.75%. When you add to this the costs associated with the issuing and sale of bonds, it will give us an average interest rate of 2.7%. When you add to this the cost associated with the issuing and sale of bonds, it will give us an average interest rate of 2.9 percent and so that the cost of the new debt is less than money at 3 percent has not been realized, but bettered.

Not only has this given Alberta the most favorable rate of interest of any province in Canada, but as a result of the negotiations just completed by Alberta's Premier, seven years have been cut off the time of the original debt reorganization program and in twenty-three years, if this schedule is followed, the total amount of Alberta's bonded debt will be paid off.

The new bonds are redeemable at the option of the province in 1950 or thereafter on 30 days notice. This should save improvements over the old schedule. The new schedule is in effect for five years before the bonds could be called. The new schedule has reduced that, to four years and cut in half the number of days of notice necessary before the bonds can be called.

Premier Manning said that the demand for Alberta bonds was excellent and that a brisk sale is expected. It is interesting to note that the recent bond sale, the interest rate is even better than the rate which the government has been paying.

(Continued on last page.)

"I'm just on my way to the bank"

He is just one of the hundreds who during the day will drop into the branch bank around the corner.

Savings depositors with their pay cheques

... retail merchants with the day's cash ... people consulting the manager about loans, others cashing cheques ... it is all part of the daily work of the branch bank.

In ten years the number of accounts maintained by bank depositors has grown from 5,000,000 to 8,000,000.

This shows how Canadians have come to count on their local banks for a great variety of services. The banks keep pace with the growing needs of the nation.

SPONSORED BY YOUR BANK

## LOGGERS and LUMBERMEN!

As from April 1st your employees are insured under provisions of the Unemployment Insurance Act. This means that contributions must be paid for them beginning on that date.

If you employ anyone in lumbering and logging you should—

1. Register with your National Employment Office.
2. Obtain insurance books for your employees.
3. Get instructions about making contributions and about rates.

Your National Employment Office is ready to assist you with all necessary information. All sawmills and planing mills come under the Act on April 1st regardless of how many weeks they operate.

Farmers and any other persons whose main occupation is non-lumbering need not be insured. If they work in lumbering and logging for 50 days or less a year and apply for exemption.

Call at the nearest National Employment Office for full information.

## UNEMPLOYMENT INSURANCE COMMISSION

C. A. L. MURCHISON J. G. BISSON R. J. TALLON  
Commissioner Chief Commissioner Commissioner

After World War I the interest the amount needed for interest on rate on borrowed money was 5 1/2%, the public debt is nearly half a billion. Now the rate is 2 1/2 per cent and yet less.

## OUR COMPLETE SHORT STORY

## THE SPUR

"Guess We're All Moralists Under The Skin."

By HAROLD HELPER

A COUNTRY doctor got to know something about everything but sometimes he realizes he doesn't know too much about anything. For instance, take my case of Jennie Wentworth. Jennie looked like she was going. Not that there was anything especially wrong with her. It was mostly an accumulation of little things, a little heart trouble, a little too much blood pressure, a little arthritis. And it was all a little puzzling.

"I mean it was all right for Jennie to take to bed and rest up for a while, but she shouldn't have been wasting away so. She was getting weaker every time I saw her. It didn't look good."

When Sam Wentworth asked me about his wife, I said, "Mostly old-age, I'd say. But maybe there's a scientific expression—lethargy. She doesn't seem to have the will to snap out of it. Has she had any emotional upsets?"

"Not that I know of," Sam said. "Of course, she did feel blue when Edie, our youngest, got married and moved away. All our kids have scattered to the four winds. They pay a visit every now and then but Jennie says the house isn't like it was when it was full."

"She needs an incentive," I remarked.

"I tried cheering Jennie up every way I knew, even got her a new radio so she could hear the programs better and I've subscribed to more magazines for her. But I guess a house without young 'uns just ain't the same."

Then Sam said, "How bad off is Jennie?"

"Frankly, I don't like it, Sam. I replied, 'I don't like cases where the patient isn't fighting with what it was when it was full.'"

"I could have said that I wouldn't have been so much when she was young."

"I could have said that I wouldn't have been so much when she was young."

## ALBERTA'S COAL PRODUCTION UP

EDMONTON—Alberta's 1949 coal production of 8,616,583 tons was valued at \$44,541,638 and was 500,879 tons over the previous year, John Crawford, director of mines, stated in a report to the legislature.

November production hit an all-time high of more than one million tons.

Last year railways bought 3,012,425 tons. Other provinces purchased 2,941,404 tons, and Albertans used 1,614,366 tons.

EGG ODDITY

LAKE MICHIGAN, B.C.—Mrs. H. V. Marwood recently found an egg in an egg in a hen house. The oddity is a normal egg within a hen, flexible-shelled one.

BOATS TO START MAY 6

EDMONTON—The 1950 navigation season of Northern Transportation Co. boats will begin May 6 at Waterville, Alta., extending until Sept. 20 inland boat service points as far north as Aklavik, N.W.T.

## MAY INCREASE WHEAT EXPORT

OTTAWA—Canada's wheat exports under the terms of the International Wheat Agreement in the next few years may be stepped up from 200,000,000 bushels a year to 230,000,000. Trade Minister Howe disclosed to the commons that this step-up may result from Canada's decision to favor the inclusion of Japan and Germany as new importing members of the multi-nation wheat pact.

WINNIPEG—A shipment of eight top thoroughbreds to be used as breeding stock—six mares and two stallions—arrived recently from Europe. The thoroughbreds were purchased in England, Ireland and France by racing magnate James Speers.

NEW GOVERNMENT BUILDING

EDMONTON—A tender will be called shortly for a \$600,000 Alberta land titles building here. Architect is the firm of Patrick-Campbell-Hop.

GOOD PRODUCTION

ASSINIBOIA, Sask.—Archie Preston Co-op Creamery director, Blomherg, came third in the Saskatchewan "greater average production" competition. His Holsteins averaged 12,638 pounds of milk each, with an average of 4.10 pounds of butterfat.

TRUCKING CASE CANCELLED

REGINA—The possibility of trucking cases from the east on a large scale is being considered by members of the Saskatchewan Automobile Dealers' association as a defence against rising freight rates and automobile "bootlegging."

WOMEN AS JURORS

REGINA—Women will be allowed to serve on Saskatchewan juries on a voluntary basis under amendments to the Jury act contained in a bill given second reading in the legislature here. Another amendment raises the age limit for jurors from 60 to 65.

RECIPES

TART FRENCH DRESSING

1 1/2 tablespoons sugar  
1 teaspoon paprika  
1 teaspoon dry mustard  
1 teaspoon salt  
1 teaspoon white pepper  
cup salad or olive oil  
2 tablespoons cider vinegar  
2 tablespoons lemon juice  
Combine dry ingredients. Add the oil gradually, beating thoroughly. For fruit salads. Makes about 3/4 cup.

Jolly French dressing: Add 1/4 cup tart red jelly, beat until jelly is beat well. Good with banana and most fruit salads. 2573

Trying to explain the reason for world wide disagreement, an Indian said, "When nations smoke pipe of peace, no one inhales."

Parliament may legislate into Doomday, but the basis of our national economy is still an honest day's work.

Every employer is looking for men who see how a thing can be done and then do it.

## Alberta oil has changed his future

The boy doesn't know it yet. Many a grown-up doesn't realize it—but the new oil fields of Alberta brighten Canada's future.

Western oil is saving 100 million source U.S. dollars this year, dollars we don't have to pay out for oil imports. This means money to buy other imports we need—things that cannot be grown or made in Canada. Next year Alberta oil should save 145 million U.S. dollars!

Then, too, the search for oil is making a big new market in Alberta for things the rest of Canada has to sell. The oil industry is spending \$3 million a week in the west. Across the nation this money is fostering new industries, expanding plants, creating jobs, paying wages, building homes.

And in the prairies petroleum product prices are lower than they would have been if oil had not been found. Prairie consumers saved more than \$30 million last year. Anything that helps prairie property helps all Canada.

Oil is important to us all. More oil means a higher standard of living. The search for oil is unending, a costly business, often disappointing. But the job is pressing forward. And new-found oil is changing our future... promising a better, brighter future for Canadians—man and boy alike!

This advertisement is appearing throughout Canada in daily and weekly newspapers.

Bringing you oil is a big job... and a costly one

Modern Weed Control With 2-4-D

After four years of intensive testing, 2-4-D is now universally recognized as an effective and powerful weapon for the control of weeds in cereal and flax crops. It is expected that over 10 million acres in Western Canada will be treated with 2-4-D in 1950. Some important factors affecting the safe, economical and successful control of weeds with 2-4-D are mentioned briefly here.

**Effect on Weeds.** Weeds vary greatly in their reaction to 2-4-D. Some weeds are very sensitive, while others are very tolerant of this chemical. Know the weeds you want to kill, and then follow control recommendations carefully. It cannot be stressed too strongly that the best results with 2-4-D are obtained when weeds, particularly narrow-leaved weeds, are in the seedling stage, and when conditions are favorable for rapid, vigorous weed growth. Most weeds become more resistant to 2-4-D as they approach maturity. Furthermore, weeds are much harder to kill during dry, hot weather when soil moisture is low. The canopy of success in weed control with 2-4-D rests in the early treatment of weed growth.

**Effect on Crops.** Cereal crops should not be treated with 2-4-D until the plants have reached the 3-leaf stage, or a height of about 6 inches. They can then be treated with safety until they have reached the early shot-blade stage. On no account should cereal crops be treated during the flowering and early-heading stages. Flax, on the other hand, may be safely treated as soon as weed growth warrants, provided the plants have already formed 4 or 5 leaves. Flax should not be treated after the plants have started to bind since there will be grave risk of injuring the crop. **Prepare Now.** Now is the time to plan your 1950 chemical weed control program. Your local Line Elevator Agent can supply you with the latest and best available information on the use of 2-4-D.

### IN THE LEGISLATURE

ernment argued in 1936 should be paid on the provinces' debt.

The premier enlarged on his report to bring the members of the house up to date on the present debt picture of Alberta and indicated that the net saving on the Canada pay and sterling bonds being retired amounts to \$8,331,000 and the interest saved as a result of the agreement reached is another \$17,445,000; thus the people of Alberta will save \$25,776,000 as a result of the debt retirement and refunding program which has been worked out. This amounts to a net saving of more than a million dollars annually. In only twenty-three years will be required to clear up our bonded debt.

In 1936 Alberta's debt stood at

more than \$167,000,000 but by June 1st of this year it will have been reduced to \$110,261,577. This is a reduction of \$56,738,423 since 1936.

Mr. Manning told the house that on a per capita basis in 1936 the debt amounted to \$210.20 for each individual but by June 1st of this year on a per capita basis, the debt will be reduced to \$125.70. There has been a reduction of \$80.45 per capita since 1936.

An amendment to the Municipal Property Act has been introduced in the house which will prevent the Doukhobors from holding communal property in Alberta. It has been brought to the government's attention that some Doukhobor groups are endeavoring to buy out some of their holdings.

**WHY NOT USE ALL THE EXAMPLES**

There is quite a campaign on now to upset the status of electrification in Alberta, from privately owned to publicly owned facilities. The plebiscite two years ago was close, but the privately owned corporations should be given the opportunity to demonstrate what they will and can do for their future.

What is forebearance but the spirit of tolerance, compared with either Saskatchewan or Alberta, thus reducing the transmission costs to a comparative minimum. Saskatchewan is having a tough time. Her water power resources are not near enough to her centres of population, and her fuel costs have been high. Now she is preparing to employ natural gas for fuel and possibly the low grade fuel oil from the Lloydminster fields. Publicly owned services are not necessarily free—Camrose Canadian.

The young lady visitor to the zoo stared at the sign on the kangaroo cage in stunned silence. The sign read simply: "Native of Australia." Finally, she turned away from the cage and shrieked. "Great heavens! My sister married one of them things!"

Three may keep a secret if one of them are dead.

What is forebearance but the spirit of tolerance, compared with either Saskatchewan or Alberta, thus reducing the transmission costs to a comparative minimum. Saskatchewan is having a tough time. Her water power resources are not near enough to her centres of population, and her fuel costs have been high. Now she is preparing to employ natural gas for fuel and possibly the low grade fuel oil from the Lloydminster fields. Publicly owned services are not necessarily free—Camrose Canadian.

Get away from business occasionally. It's cheaper to take a voluntary vacation than wait till the doctor orders it.

Getting into the Home

Woman buy more than two-thirds the merchandise sold in retail stores and every woman needs the Classified Want Ads. Our paper goes into the home and the Want Ads will reach the spender.
